To: Current and Potential Customers

CHASAN Industrial Complex is pleased to announce the completion of a newly added 16' by 16' ground level entrance door for unloading and loading of tractor/trailer rigs inside of building.

We have had several requests for unloading product inside of building for weather protection of product, machine storage, and over sized product storage. With this addition we feel this will provide our customers with the option for improved manufacturing processes and warehousing of different type product.

CHASAN currently offers many services including local trucking services, Norfolk Southern rail services, logistics, manufacturing and warehouse space leasing, truck load/unload services, and food grade storage. Our facility is a 100% food grade facility complete with pest control, fire protection, and 24 hour monitoring by Fleenor Security.

Call and schedule a visit to our facility (former Magnavox building) in Greeneville, TN. We will be happy to provide a quote for our services and your space needs.

Please see attached picture of our new 16' x 16' ground level door.

Thanks
